v1.3

**L^AT_EX support files for Softmaker
Congress available at
<http://www.freefont.de>**

August 19, 2010

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker Congress fonts available at www.freefont.de in November 2009.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

1 Congress (November 2009)

1.1 Package options

The font style file offers the following options:

1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

1.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from [Softmaker](#). Copy the Postscript Type1 fonts `CongressSerial-Regular.pfb`, `CongressSerial-Bold.pfb` and `CongressSerial-Italic.pfb` to your local T_EX tree:

```
TEXMF:/fonts/type1/softmakerfreefont/Congress/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
6cg	m	n	Congress	OT1, T1, TS1
6cg	m	it	<i>Congress</i>	OT1, T1, TS1
6cg	m	sl	<i>Congress</i>	OT1, T1, TS1
6cg	m	sc	CONGRESS	OT1, T1, TS1
6cg	b	n	Congress	OT1, T1, TS1
6cg	b	sl	<i>Congress</i>	OT1, T1, TS1
6cg	b	sc	CONGRESS	OT1, T1, TS1

1.3 Installation

The following steps will show you the installation in the case of MiKTeX. For another T_EX distribution please take a look in its documentation.

- get [congress.tds.zip](#)
- extract it in the main directory of your local T_EX tree
- update the FileNameDataBase (FNDB) in MiKTeX Settings or with `initexmf -u1` on the command line

¹for system-wide installations you have to add the `--admin` switch

- include the map file
 - run `initexmf --edit-config-file updmap`
 - add `Map congress.map` in the opening editor
 - save the file and close the editor
 - run `initexmf --mkmaps`

1.4 Usage

If you want to typeset your complete document with the font Congress simply add `\usepackage{congress}` to your preamble. If not, simply add another font package after `\usepackage{congress}`. You can switch to the font Congress with the command `\FFCongress`, which is a shortcut for:

```
\fontfamily{6cg}\fontseries{m}\fontshape{n}\selectfont
```
