<<http://www.gnu.org/licenses/old-licenses/gpl-2.0.html>>  
<<http://www.gnu.org/licenses/old-licenses/gpl-3.0.html>>

Everyone is permitted to copy and  
distribute verbatim copies of this  
license document, but changing it is not  
allowed.

Preamble. The GNU General Public License  
is a free, copyleft license for software  
and other kinds of works. The licenses  
for most software and other practical  
works are designed to take away your  
freedom to share and change the works.

By contrast, the GNU General Public  
License is intended to guarantee your  
freedom to share and change all versions  
of a program—to make sure it remains  
free software for all its users. We, the  
Free Software Foundation, use the GNU  
General Public License for most of our  
software; it applies also to any other  
work released this way by its authors.  
You can apply it to your programs, too.

When we speak of free software, we are  
referring to freedom, not price. Our  
General Public Licenses are designed to  
make sure that you have the freedom to  
distribute copies of free software (and  
charge for them if you wish), that you  
receive source code or can get it if you  
want it, that you can change the  
software or use pieces of it in new free  
programs, and that you know you can do  
these things. To protect your rights, we  
need to prevent others from denying you  
these rights or asking you to surrender  
the rights. Therefore, you have certain

responsibilities if you distribute  
copies of the software, or if you modify  
it: responsibilities to respect the  
freedom of others. For example, if you  
distribute copies of such a program,  
whether gratis or for a fee, you must  
pass on to the recipients the same  
freedoms that you received. You must

## Where is Mudbox 2017?

2850 Views, 16 Replies  
06-25-2016 04:53 AM

Options

Hi,

I purchased Mudbox back in March 2015, and 6 month subscription to tie in with my 3ds Max subscription renewal date, and another 1 year subscription last September.

The only reason I continue to pay the annual subscription each year is to get the latest version of each product.

Although I do occasionally use the maintenance support side of the subscription, 99% of the time its to report bugs in the new version, everything else I always end up solving myself, so I'm paying each year for the latest release, and I am sure most other subscribers do the same.

If Mudbox will not be getting any future releases, I feel like I have thrown away one and a half years worth of subscription money, and that maybe I should have invested in Z-brush instead, if Autodesk's intention is to retire Mudbox...

I hear that Mudbox has now been integrated into Maya, although I don't know if its a full functional version, or cut down version.

So do Autodesk think that Max users don't want this integration?

There is still a lot of room for improvement with Mudbox, and I think that Autodesk could take a few ideas from substance painter on the object painting and material editor integration within max.

A sales rep from Autodesk phoned me earlier this year and hinted that in the very near future, Max and Maya will become one....

So is Autodesk's intention to slowly integrate its creation suites into one package, starting with Maya+Mud, then Max in the near future?

3ds Max and AutoCAD made Autodesk what they are today, so its a shame that development seems to be going more and more toward Maya and possibly if the rumour is true, phasing Max into Maya.

Hello, I purchased a stand alone license for Mischief 2 last year and I really like it. this said I am hesitant to really use it too much as it seems it has possibly been discontinued? I do not see any recent activity past the announcement that it had been sold to the Foundry. Is the program still active or has it been discontinued?

Sincerely,

Patrick Eggers

It would be nice to have it folded into the main website and the forums moved over here, it feels disconnected.
